# ZINKERS – for sustainable fishing

- Heavy duty zinc sinkers (ZINKERS) for the fishing industry
- Contains no lead – lead is a cumulative toxicant that affects multiple body systems. Direct contact with lead and human skin is harmful, and can start allergic reactions as well as transfer of lead into the human organism.
- Developed in cooperation with the DTU, Technical University of Denmark
- Automated high pressure casting process, which ensures a very high quality
- Very hard surface – last 5-6 times longer than lead sinkers
- No burrs, holes or damages – save 3-4 man hours of deburring

*At Cosmos Trawl we make first-class fishing gear and have constant focus on product development. When introduced to Zinkers we found the optimal sinkers to replace lead. It's not harmful to the environment and our craftsmen – and it's easy to reuse and last 5-6 times longer than lead sinkers.*

**Arne F. Olesen**  
Sales Manager, Cosmos Trawl

Cosmos Trawl is part of the international Hampidjan Group and recognised as Denmark's largest and oldest net maker company.
